[OPEN](#)

Having tough assignments or other hard exercises on hand and looking for study help online but, can't afford a subscription? Make use of our Free Chegg Accounts Username and Password that works as of February 2020 and save both your money and time when completing homework.

Being a student in college can be an overwhelming experience, as you must be constantly competing with the other students there and finishing the endless amount of homework and research you get assigned. If you have taken your studies to the next level, you must have heard about sites like Chegg at least once already. What's better than having a supportive hand that always does homework & assignments for you? Chegg is the website behind the success of many smart students, and you shouldn't be afraid of trying it! On Chegg, most of the students get help and assistance with their assignments or homework.

So if you are looking for someone to aid you with your study works, Chegg.com could be the best option for you! You can sign up on their website for free, but if you need tutoring or you want to use their textbooks, you are required to pay a fee. Said fee can be higher or lower depending on the type of help you choose. To be honest, having a free Chegg account without a paid subscription is like having a 52' UHD TV without a cable subscription: simply useless.

How to Get Chegg Free Trial (28 Days)

You need help with your homework, but you don't wanna pay before making sure if the subscription is worth or not? Chegg offers a 28-day free trial on Chegg study and tutor plans. To activate the offer you won't have to use any promo codes – just follow the steps we will show here.

Sign up for Chegg free trial doing this:

1. Go to [Chegg.com](#) and click on the "Try now" button.

2. After this, you should **sign up and create a new Chegg account**. Fill the required information fields, use the email/password combination of your choice, and click on the "Create account" button. (If you already have a free Chegg account, skip this step, and just log in to it)

3. In the next page, enter your **payment details**, and click on the “**Join now**” button.
4. Your free trial will get activated instantly, but you won't be charged for this. Within the 4-week trial period, any kind of help on any kind of subject you look on Chegg will be free.
5. The free trial includes unlimited access to its huge Q&A database. Also, you are allowed to hire a professional to teach you online for 30 minutes in a private session.

“ **Note:** At the end of the free trial, your credit card will get charged and your subscription will be extended for a month. If you don't want to pay it, you should cancel your subscription shortly before the free trial finishes.

Free Chegg Accounts List February 2020

We have several Chegg login credentials available. every Chegg account has a different subscription type – we cover almost all the plans that are currently available on the site. We regularly add new & unused Chegg accounts and share the login details for free everyday between 09:00 PM and 10:00 PM GMT-7 (Los Angeles, California, United States) time.

Chegg Account Not working?

Please Report to us If the Chegg premium account not worked for you!

SPONSORED SEARCHES

If you didn't get a working Chegg account, you should check our list in a later time – we may update it. If you need help with your question immediately, you can ask us directly, making use of our free study help service, which we will be explaining now.

Search For Free Chegg Accounts On Reddit, Quora & Social Media Sites

Maybe you are not one of those guys who need constant help from Chegg and you only have a couple of minutes to solve. You can find some more details to solve...

have a couple of questions to solve. You can try some sorts or tricks to get your assignments done. This will not always give you a positive result, but you have a pretty good chance to get what you want. In this method, you will **search for free Chegg accounts on social media websites**.

Reddit and Quora are the best active community sites on the Internet. Therefore, they have a huge database of useful information. If you want to get notified of good deals, free Chegg account giveaways, or you just want help from someone with a Chegg subscription, you should search for Chegg communities on these sites, and join them (for example, if you already have a Reddit account, just log in and search for Chegg communities in the subreddits) or just follow the links we given below.

After joining, keep up with those pages and be aware of the latest updates. If you are not patient enough to do this, or you need immediate help, then try to **ask for help from other people in the community – if you are lucky, they might help you out**. But in our opinion, instead of trying this long and time-consuming process, the best course of action is to try our previous listed method. **You just need to leave your question in the comments section of this article and let us get the free answers you need from Chegg.**

Tip: Do you also want Free Gift Cards? Don't miss to checkout our previous articles about [Free Amazon Gift Cards](#), [Free Steam wallet codes](#) and [Free Xbox Live Codes](#).

We sincerely hope that you have learned way more by using a Chegg account than with any lecturer in school. What has been your experience with Chegg until now? Tell us about it in the comment section, and remember – if you need some help, we can help you!

Bounce Again And Again Down A Long Straight Concrete Path. The Ball Is Thrown Horizontally From A Height Of $h_0 = 1.5$ M With An Initial Speed Of $V_0 = 15$ m/s. The Coefficient Of Restitution Between The Golf Ball And The Concrete Is $E = 0.92$

This problem has been solved!

See the answer

Projectile Motion and Impact: Just for fun, a golfer throws a golf ball horizontally through the air and watches it bounce again and again down a long straight concrete path. The ball is thrown horizontally from a height of $h_0 = 1.5$ m with an initial speed of $V_0 = 15$ m/s. The coefficient of restitution between the golf ball and the concrete is $e = 0.92$.

(A) Determine the maximum vertical height the golf ball will reach after its third bounce, h_3 .

(B) Determine a formula for the maximum vertical height the golf ball will reach after its n th bounce,

nn, in terms of the variables, h_0 , g , e , and n .

(C)The bouncing of a small sphere is modeled as dynamic particle motion. Particles are assumed to be point masses that take up no space, even though the diameter of a golf ball is about 42.7 mm in reality. Eventually, after enough bounces have occurred, the golf ball will cease bouncing and roll along the ground. If we suppose that rolling begins when the bounce height drops to half the sphere's true diameter, after how many bounces, m , will rolling begin?

Hil Can I please get an answer for this one? Thanks!

Problem 2 Twenty people is a random sample of people who started to train in a swimming school and immediately participated swimming contest for 1 kilometer race. Let X_i – time in minutes to finish the distance for participant $i = 1, \dots, 20$. Then after two months of training the contest was repeated, and results of the same people are given as Y_i , for $i = 1, \dots, 20$. $20 X = 520$ $SX^2 = 9984$, $X = 26$, $Y = 22$, $5, -6, 5, -4$. In swimming, difference between time per 1 km before some training period and after is named Time Drop.
